Technical Data

Cooling Capacity(kcal/h)	32000
Heating Capacity(kcal/h)	30000
Battery Cooling Capacity Driving/Charging (kW)	5/8
Evaporator Airflow(m^3/h)	6000(6Pcs)
Condenser Airflow(m^3/h)	10000(5Pcs)
Refrigerant	R407C
Weight(kg)	315
Size(mm) L*W*H	3250*2000*260
Application(M)	10-12

- The battery air conditioner and the vehicle air conditioner is integrated, resulting into the cost reduction of 30% and the weight reduction of 20%.
- The requirements of air conditioning heating and battery cooling in low temperature environment are met.
- Two-way electronic expansion valve is precisely regulated, coupled with PID intelligent control, and evenly distributes the cooling capacity inside the vehicle and battery side.
